First-time awardees by scheme 2008-14

The chart shows the number of first-time awardees for each year from 2008 to 2014. The vertical axis represents the number of awardees, while the horizontal axis represents the years. The chart is divided into two categories: # DECRA first-timers and # DP first-timers. The green line indicates the percentage of first-timers.
Participation and success of CIs in DP13 and DP14 by gender and career age
Success rate (%) of HCA/SBE CIs in *Discovery* by career age (yrs post PhD) 2002-14

(Note - fellow applicants have been included as funded on all funded projects)
Success rate (%) of HCA/SBE CIs in Discovery, by title and type of university (2002-14)

(Note - fellow applicants have been included as funded on all funded projects)
Cross-disciplinary collaboration
Number of single and cross-disciplinary projects (2010 to 2014), in LAW

Cross-disciplinary projects are those where the applicant indicated that the research content was distributed over at least two 2-digit FoR codes, with no more than 70 per cent in any one of those codes.

Single-disciplinary projects are those where the applicant indicated that more than 70 per cent of the research content in the proposal lay within a single 2-digit RFCD code.
### Percentage totals of other FoR codes in projects (2010/11 to 2014), all schemes

The table below illustrates the percentage totals of other FoR codes in projects from 2010/11 to 2014, across all schemes. The data is color-coded to indicate the level of discovery and linkage for each FoR code. The legend at the top-left corner uses blue for discovery and orange for linkage. Each cell represents the percentage of projects involving the corresponding FoR codes, with darker dots indicating higher percentages. The red arrow points to a specific cell, indicating a notable percentage in that area.
