Professor Peter Goodyear

Learning, technology and design: architectures for productive networked learning

Current Organisation:	The University of Sydney
Administering Organisation:	The University of Sydney
Primary research field:	Specialist Studies in Education
National Research Priority:	Frontier Technologies for Building and Transforming Australian Industries

Professor Peter Goodyear is a Professor of Education and Co-Director for the Centre for Research on Computer-Supported Learning and Cognition at The University of Sydney. His research focuses on learning technology and the learning sciences; teachers' knowledge and beliefs; technology-enhanced professional learning and educational design tools and methodologies.

Professor Goodyear will investigate better ways of helping people to meet their learning goals. His research will provide ways of analysing and improving the increasingly complex systems in which learning takes place, especially those where computer technology plays a strong part. The project will focus on networked learning—where people learn through collaboration that is wholly or partially online. It will explain how better tools and resources for networked learning can be designed, and how everyone can play a significant role in improving how, where and what they learn.

Professor Goodyear received his D.Phil. in Geography from the New University of Ulster, UK. He is a member of the executive of the Australian Association for Research in Education, responsible for research development. He was a founding executive member of the UK Association for Learning Technology. He is also a member of the Australian ICT in Education Committee and was previously a member of the International Board of Standards in Training, Performance and Instruction.

Professor Goodyear is lead editor for the international journal *Instructional Science*. He sits on the editorial boards of a number of other journals including *Distance Education* and the *Journal of the Association for Learning Technology*. He has given many keynote and other invited presentations at international conferences and workshops in Europe, North America, Asia and Australia. In 2007 he became a Senior Fellow of the Australian Learning and Teaching Council.
