

# Summary of Linkage Infrastructure, Equipment and Facilities Proposals by State and Organisation

## New South Wales

### Southern Cross University

**LE100100013** Prof Bradley D Eyre, Prof Peter L Harrison, Dr Malcolm W Clark, Dr Isaac R Santos, Dr Joanne M Oakes, Dr Dirk V Erler, Dr Edward D Burton, Dr Perran L Cook, Prof John Beardall, Dr Michael R Grace, A/Prof Ian D McKelvie, Prof Leigh A Sullivan

**Approved Project Title** Eddy correlation lander array

2010 \$170,000.00

Primary FoR 0399 OTHER CHEMICAL SCIENCES

#### Partner/Collaborating Organisation(s)

Monash University

**Administering Organisation** Southern Cross University

#### Project Summary

The proposed Eddy Correlation Lander Array will be the first in world and, as such, will allow ground-breaking research to be undertaken resulting in advances in a variety of fields. As such, this equipment will significantly enhance many core research programs at Southern Cross University and Monash University and enhance our ability to deliver high quality research in the National Research Priority Area of An Environmentally Sustainable Australia, with priority goals in water resources, responding to climate change and variability, overcoming soil loss, salinity and acidity and sustainable use of Australia's biodiversity.
